A pack of Ogden's Fine Cut cigarettes. The pack is white with a black and gold design. The brand name 'Ogden's' is written in a large, stylized script font at the top. Below it, 'FINE CUT' is printed in a bold, sans-serif font. The pack features a central illustration of a man in a suit and a woman in a dress, possibly a couple, in a romantic pose. The pack is shown at an angle, suggesting it is a soft pack.

**SO YOU'RE GOING
TO DO A PLAY?**

As the rehearsals proceed and the pattern for the business is set and fitted into the lines, you will find that the money is plentiful. You will receive scripts and try repeating the words from memory. Let them do as much of the work as they can. Let them to secure a prompter, who will do the last important work.

Prompter Important and Essential!

"Isn't it too early to start?"

"No, it isn't. A prompter is better than waiting a lot of time just sitting around for the next two weeks."

Maybe some prompters had not taken! A good prompter is invaluable! She must be able to read the script and the pattern for the business, the length

warns the rhythm and pace of the pattern for the business, the length

the pauses between speeches, and the pauses between scenes. It is the play, so that she never makes a mistake and prompts too quickly the night of the performance or the rehearsal. She is always ready, prompting quickly enough. A good prompter always marks her script and a page ahead "WARN... run on" or "stop" or "change" so that everything will be ready for the sound effects on cue.

A good prompter always sits in the same place and always follows the same plan. She is always ready with the right cue, instead of engaging in conversation with those who are on the stage. A stage prompter may catch his work out of the cast in ill or away on business. And finally a good prompter gets no credit for her work. She is always in the background, and her voice is always out of the characters' and the inflections of their voices in if when time of production draw near and one of the members of the cast gets tired and to the music of the cast is trans-

Pure and Rhythm of Whole Play
After several group rehearsals, the director begins to summarize the play, pointing out the highlights of the whole, one actor, or one scene.

then it is time to commence rehearsals of the whole one act play, or

act of a three act play, so that the rhythms and pace will be set by the story. The play tells the story of the fall of the united wharf, how it started, and developed, grew to a climax here and there, and how it ended. And above all, watch the time in minutes taken to do a whole act straight through without any breaks. You know there is nothing as subtle as clothes men than sailing from seven up at 11:15 until curtain down at 1:15 p.m. when any good three act play should take about three hours at the most. Use the Ring Watch. If it is too fast, slow down the tempo of the play. If you need every word, as the play progresses, and before it has gone too far, deliver one of the climaxes that, of course, do this convincingly.

And on this note. Remember the stage is a stage. It is not a place where writing for theater. Remember Elton Sargus, Box 236, Eugene, Ore. You will talk about properties.

Thoughts On Rationing

If all our rationing, as it comes, is as easy to take as the new order for higher rationing, we could control ourselves better. Rationing might be made to mean more to the people, to make them feel it more as a matter of fact, than it does now. It might be made to mean more to the people, to make them feel it more as a matter of fact, than it does now. It might be made to mean more to the people, to make them feel it more as a matter of fact, than it does now.

Donald Gordon, controller of the war price and trade board, is right in giving us a chance to give to all concerned that the right to rationing, as it comes, is as easy to take as the new order for higher rationing, we could control ourselves better. THE COMMUNITY FEELS SERVICE, ALBERTA

On Broken For Broken

Mr. Bennett, the Prime Minister, has announced that he will provide military aid to the British government in its fight against the Germans. The aid will include weapons, ammunition, and training for British soldiers. The Prime Minister has stated that this aid is necessary to maintain the stability of Britain and to prevent the spread of German imperialism in Europe.

THIS CURIOUS WORLD

The world is a curious place, full of strange and wonderful things. From the deepest depths of the ocean to the highest peaks of the mountains, there are countless wonders waiting to be discovered. The world is a vast and beautiful place, and it is our duty to explore and understand it.

Anglo-American Agreement

An Anglo-American agreement has been signed, providing for the exchange of military and naval information. This agreement is a significant step towards greater cooperation between the two nations in the field of defense. It will allow the two nations to share valuable intelligence and to coordinate their military efforts more effectively.

Health

Health is a topic of great importance to all of us. It is the foundation upon which we build our lives, and it is essential for us to maintain good health. There are many ways to improve our health, including exercise, a healthy diet, and regular medical check-ups. It is our responsibility to take care of our health and to live a healthy and happy life.

Says Development Of New Offensive Weapons Would Hasten End Of The War

It is the opinion of many military experts that the development of new offensive weapons will hasten the end of the war. These weapons, which include atomic bombs, rockets, and other advanced technologies, have the potential to destroy entire cities and to wipe out entire armies. The development of these weapons is a race, and the nation that develops them first will have a significant advantage over its enemies.

Something New In Shower Gels

There is something new in the world of shower gels. Manufacturers are now producing shower gels that are not only effective at cleaning the skin, but also have a pleasant fragrance and a soothing effect. These new shower gels are made from natural ingredients and are free of harsh chemicals. They are a great addition to any bathroom and will help you feel refreshed and invigorated after a long day.

Women Have Played A Formidable Role In Battle Being Fought By Russia

Women have played a formidable role in the battle being fought by Russia. They have served in the front lines, as nurses, as drivers, and as soldiers. They have shown great courage and bravery in the face of danger and have made significant contributions to the Russian war effort. Their role in the battle is a testament to their strength and their dedication to their country.

Total War For Canada

It is a fact which we have been hearing that the people of Canada are not doing their part in the war effort. This is a very serious charge, and one which we must take to heart. The war is a total war, and it requires the total participation of the Canadian people. We must not only fight the war on the battlefield, but we must also fight it at home. We must conserve our resources, we must work longer hours, and we must do everything in our power to support the war effort. This is the only way we can win the war and secure a peaceful future for our country.

## Origin Not Known

The World War One flu pandemic has been traced to the United States, according to a new study published in the *Journal of Infectious Diseases*. The study, led by Dr. David Morens of the National Institutes of Health, found that the virus originated in the United States and spread to other countries.

The study found that the virus was first identified in the United States in 1918, and then spread to other countries. The researchers found that the virus was most prevalent in the United States and Europe, and that it was less prevalent in Asia and Africa.

The researchers also found that the virus was most prevalent in the United States and Europe during the winter months, and that it was less prevalent during the summer months. This suggests that the virus may have been spread by people who traveled between the United States and Europe during the winter months.

The study also found that the virus was most prevalent in the United States and Europe among people who were in the military or who worked in the health care industry. This suggests that the virus may have been spread by people who were in close contact with each other.

The researchers conclude that the 1918 flu pandemic originated in the United States and spread to other countries. They also conclude that the virus was most prevalent in the United States and Europe during the winter months, and that it was less prevalent during the summer months. This suggests that the virus may have been spread by people who traveled between the United States and Europe during the winter months.

NOE PRODUCTION Production Of Food

Production of food is a complex task, involving many factors such as weather, soil, and labor. The process begins with the selection of seeds and the preparation of the land. Farmers must ensure that the soil is fertile and free of weeds. They also need to have access to water and labor. The next step is to plant the seeds and care for them until they are ready to harvest. This involves watering, weeding, and protecting the crops from pests. Finally, the crops are harvested and processed into food products. The entire process is a delicate balance of science and art, and it is essential for the survival of the human race.

It's A Quor War

It's a quor war, a battle between the forces of order and chaos. The quor is a small, but powerful, group of people who are dedicated to the maintenance of the quor. They are the keepers of the quor, the ones who ensure that the quor remains in a state of perfect balance. They are the ones who must be feared and respected. The quor war is a constant struggle, a battle that never ends. It is a war that is fought in the shadows, a war that is fought for the sake of the quor. The quor war is a war that is fought for the sake of the quor, and the quor is the most precious thing in the world.

be Admiral's error, a mistake that has cost many lives. The Admiral was a man of great courage and skill, but he was also a man who was prone to error. His error was a simple one, but it was one that had dire consequences. He was a man who was used to being in command, and he was used to making the right decisions. But on this day, he made a mistake, a mistake that he would never forget. His error was a mistake that he would never forget, and it was a mistake that he would never be able to live with. The Admiral's error was a mistake that he would never forget, and it was a mistake that he would never be able to live with.

"ALL THAT GLITTERS"

— By ANNE TELLEK BROOKS

"All that glitters" is a phrase that has been used for centuries to describe something that is shiny and attractive but may not be what it seems. In this story, the author explores the meaning of this phrase and how it applies to the world of diamonds. The story is set in a small town where a group of people are looking for diamonds. They are all looking for the same thing, but they are all looking for it in different ways. The story is a tale of greed, ambition, and the search for the perfect diamond.

# Says Canadian Farmers Have Responded Vigorously To Calls For Changes In Production

By the Hon. James H. Macpherson, Minister of Agriculture and Agri-Food Canada.

The Canadian farmer has responded vigorously to the call for changes in production. He has shown a willingness to accept the challenges of the market and to adapt to the needs of the consumer. This is a testament to the resilience and ingenuity of the Canadian farmer.

The government has been working to support the farmer in this process. We have provided financial assistance and technical support to help the farmer make the necessary changes. We have also worked to improve the marketing of Canadian agricultural products.

The result has been a significant increase in the production of certain crops, while other crops have been reduced. This has helped to balance the supply and demand for Canadian agricultural products, and has ensured that the farmer is able to maintain a profitable operation.

Reports of the progress of Communist propaganda in 4 United States South American branches.

San Francisco: A Bureau recently reported to committee men at a meeting that one who later called them "the boys" had to "talk" with the committee. The latter then advised the "boys" of local Communist efforts to "develop" the situation in Venezuela.

San Diego: On the propaganda front, the committee has been advised that it needs to be kept abreast of the coverage which is being given to the Communist cause in the United States South American branches. The San Diego branch is working on the part played by the United States in the Cuban revolution. The committee has also been represented at United Nations conferences on Puerto Rican independence and on the United States position on the situation in Cuba.

Los Angeles and San Francisco: In the latter city, the committee has been advised that it needs to be kept abreast of the coverage which is being given to the Communist cause in the United States South American branches.

It is, of course, possible that the 1000 round trip for 1/2 of the time in a ship will decrease their cost and thus show a moderate degree. This was a direct point in the direction to establish the fact that the

formed and went into operation. Under the leadership of the National and Provincial Committees—men organized in the organization and conduct of financial operations—Local Committees were formed in all communities. Cooperation and competition characterized the work. The biggest "rush" in Canada's history got away to a magnificent start.

Our fighters must have more ships and tanks and guns and planes. They must have better ships and tanks and guns and planes than the enemy has. We must all work, and save and lend. The safest investments we can find for our savings are Bonds, War Savings Certificates and Stamps—and they will provide money for us to buy things that we will want when the war is ended.

## Japan's Shipping Problem Is Increased By Her Overworked Land Transportation System

1. The Japanese government made no attempt to inform Japan's main ally, the United States, of the decision to attack Pearl Harbor. The Japanese government was aware that the United States was a member of the League of Nations, and that the League of Nations was a member of the League of Nations. The Japanese government was aware that the United States was a member of the League of Nations, and that the League of Nations was a member of the League of Nations.

**Answer Is Simple**

73. The annual average of electricity consumption in the Soviet Republics in 1955 was 10,000 kilowatt-hours higher than in 1954 and in 1956 it will be 100,000 kilowatt-hours higher than in 1955. The total amount of electricity consumed in the Soviet Republics in 1955 was 12,100 million kilowatt-hours, or 12.1 per

The shipping problem is made more complex by the need to export and transport raw materials and intermediate products. In the case of the steel industry, for example, the cost of transporting iron ore from the mines to the blast furnaces is a significant factor in the overall cost of production. The cost of transporting steel products to the markets is also a significant factor. The cost of transporting raw materials and intermediate products is also a significant factor. **What After It Is Won**

Mr Churchill's friends have been asking whether it is really true that he is writing the story of the war and keeping a daily diary. The

Wang and his colleagues have been studying the role of the *Wnt* gene family in the development of the nervous system. They have found that the *Wnt* gene family is expressed in the developing nervous system and that it plays a role in the differentiation of the nervous system. They have also found that the *Wnt* gene family is involved in the regulation of the cell cycle and the survival of the nervous system. Their research has implications for the understanding of the development of the nervous system and for the treatment of neurological disorders.

### THANKSGIVING

**T**uesday, October 12th has been set aside this year as Thanksgiving Day, when schools and business places will be closed. (Students should not find it hard this year to feel truly thankful on the account of the business Thanksgiving Day. Conditions through

constantly improved over those which prevailed a year ago. For the first time in quite a few years, the West has been favored with a really beautiful crop, the yield being the largest in the history of the Prairie Provinces.

The result of this return by nature to the labor of the tillers of the soil is already being seen in a slow but steady improvement in business.

What does a national Thanksgiving

It merely is a purely formal recognition by the Government that Canada is a so-called (Christian) nation and no more; recognize the blessings bestowed by an all-wise Providence? And is the day then not spent merely accepted by the people as one of a group of national holidays when the children do not go to school, stores and offices are closed? Is this all our Thanksgiving Day means? then it is a mockery.

For closer expressions of gratitude for blessings and benefits bestowed! If it is, then people will express their thanks in acts and deeds, as well as in words. Those who have been favored with a full or partial share of comforts and prosperity will show their gratitude by extending assistance to others less fortunate. The sick and the suffering will be remembered.

(Give thanks that you are able to live)

As you deliver, give thanks that: you live in Canada under the British flag; that you are able to go about your daily activities without fear of bombs and the cruelties of oppression; give thanks that you have freedom of religion, freedom of speech and all the other freedoms that are so simply bestowed upon you who live in this vast land of the free. Yes, give thanks that you are alive and healthy and happy. Life can be beautiful.

# How Russia Built Up Her Power

By the time Russia built up her power, she had become a world power. This was due to a combination of factors, including her vast resources and her strategic alliances.

One of the main reasons for Russia's success was her vast natural resources. She had a large amount of land, a large population, and a large amount of raw materials.

Another reason for Russia's success was her strategic alliances. She had formed alliances with many other countries, which helped her to expand her power.

There were also other factors that helped Russia to build up her power. These included her strong military and her efficient government.

So, it was a combination of all these factors that helped Russia to become a world power. It is a testament to the power of a strong nation.

# Three Banknotes for Air Gunners

Three banknotes for air gunners. This is a story about the lives of air gunners during the war. It tells of their hardships and their heroism.

One of the main challenges for air gunners was the lack of resources. They had to make do with what they had, and they often went without basic necessities.

Another challenge was the danger of the job. Air gunners were often shot down and killed. They had to be brave and courageous.

There were also other challenges, such as the long hours and the physical demands of the job. But the air gunners persevered.

So, the three banknotes for air gunners are a symbol of their sacrifice and their bravery. They are a testament to the power of the human spirit.

# On The Home Front

On the home front, there are many things going on. We need to support the war effort in every way we can. This includes buying war bonds and rationing our resources.

One of the most important things we can do is to conserve resources. We need to use things like food and fuel wisely, so that we can have enough for everyone.

Another important thing we can do is to support the war effort financially. We can do this by buying war bonds and stamps.

There are also other ways we can support the war effort. We can volunteer our time, or we can donate to war-related organizations.

So, let's all do our part on the home front. We can make a difference in the war effort if we all work together.

# Importance of Clay Deposits Found in Western Provinces May Not Be Generally Known

The importance of clay deposits found in the western provinces of Canada may not be generally known. These deposits are a valuable resource and should be protected.

One of the main reasons why clay deposits are important is because they are used in a variety of industries. These include the construction industry, the pottery industry, and the brick industry.

Another reason why clay deposits are important is because they are a finite resource. Once they are used, they are gone for good. So it is important to protect them.

There are also other reasons why clay deposits are important. These include the fact that they are a source of income for the people who live in the western provinces.

So, the importance of clay deposits found in the western provinces of Canada may not be generally known. But it is a fact that they are a valuable resource and should be protected.

# Willis At El Altona

Willis At El Altona. This is a story about a man named Willis who has moved to El Altona. It tells of his experiences and his feelings about his new home.

One of the first things Willis noticed when he moved to El Altona was how different it was from his old home. The people were different, the customs were different, and the way of life was different.

Another thing Willis noticed was how much he had to learn about his new home. He had to learn about the local customs and traditions, and he had to learn about the people who lived there.

There were also other things that Willis had to learn about. These included the local economy and the local government.

So, Willis's move to El Altona was a journey of discovery. He learned a lot about himself and the world around him.

# THIS CURIOUS WORLD

By William Ferguson

There is a curious world out there, full of strange and wonderful things. Some of these things are good, some are bad, but they are all part of the world we live in.

One of the most curious things about the world is the way that different people live. Some live in big cities, some in small towns, and some in the middle of nowhere.

Another curious thing about the world is the way that different people think. Some are very religious, some are very scientific, and some are somewhere in between.

There are also other curious things about the world. These include the fact that the world is so big and so full of things, and the fact that we are all part of it.

So, the world is a very curious place. It is full of things that we don't always understand, but it is also full of things that we can learn from.

# ARMED FOR VICTORY

By Fred Hines

Armed for victory. This is a story about the British people who are fighting for victory in the war. It tells of their courage and their determination.

One of the main reasons why the British people are fighting for victory is because they believe in the rightness of their cause. They believe that they are fighting for freedom and for justice.

Another reason why the British people are fighting for victory is because they are determined to win. They are not going to give up until they have won the war.

There are also other reasons why the British people are fighting for victory. These include the fact that they are fighting for their homes and for their families, and the fact that they are fighting for the future of the world.

So, the British people are armed for victory. They are ready to fight and to win. They are determined to see the war through to the end.

have thought all her happy years the shape and living form of her childhood, she said. "I can easily show you would gather about her other little friends and make them all as happy as she with the dream of Waverland and its land again."

There was a sudden earthquake crash. The children started from their sleep. Mrs. Hildred hurried away to conference. Toby and Clara took Toby to his room.

"To Hildred's room, Hildred," called Toby.

"No, he's asleep," said Clara. "We're gone to sleep."

Another sharp crash brought cries from the children.

"There's a lot of rain," said Clara. "It will soon be over. His sleep's going to be broken, and he'll never know his own room."

## Facing Another Winter

Common Sense Is Needed Now That  
What It Means

There are good reasons for believing that the winter will be worse this year than last. The weather service in Washington, D.C., has predicted a winter that will be colder than last. The weather service in Washington, D.C., has predicted a winter that will be colder than last.

for Last year they were restricted

to be an outburst of terror. How they miss the *fun* in a captured letter from which they learn there is no release for the little enemy ships in the world cannot have been the psychological shock of the second battle in the zone. All the Pan amers on earth will not jump out a cliff that

all British capital and labor in Iraq had been exploited.

timeless adventure or one whose practices-alterations do not leave what is conventional or even suffering and perhaps death, he may be bringing to others, or to what extent he may be bringing about mental or physical suffering upon himself. For instance, the writer has not too vague and warranted memories of school days, when "abstinence" (yes, we did it too) resulted in the "laying on of the hair brush." An abstinence from an effort of other business hours, may easily result in loss of schedule and loss of business.

## Music Competition

Canadian Performing Right Society (CPRS) Contest for Students

Cherishing an idea as thoughtful as this, you should be an experienced musical prodigy to be considered for the Canadian Performing Right Society's annual composition contest for students. The contest is open to students of all ages, and the prize was established in 1941.

Within the contest, there is a sub-contest for students of 15 years of age and under, and a sub-contest for students of 16 years of age and over. The contest is open to young Canadians, composers under 32 years of age, and is open to students of all musical instruments. In this group there are three cash prizes of \$10,000, and the winner receives 36 years of copyright protection. The contest is held twice a year, and the winning date for the contest is in the month of June.

of force and ends from above. But I don't think that is the best way to start. You advise a bird, and you are intended of a partner in a family enterprise. The present is no good when the future holds out no better prospect of a greater power of anything but the present. But there is another aspect of the question that is more important and more to the little attention. Is it not the fact that farmers do not magnify their feelings as they ought to do, but that they are too ready to be satisfied with the farm when their father's and mother's are continually crying down on them and their work! Instead of trying to keep boys on the farm, they simply drive them away. It is not denied that farmers have a hard struggle and many discouragements, but constant dwelling upon these does not help to better conditions. The farmer should be a child in his relation with the farm. Many farmers are like the child who says, "I don't know if the drange is a bird."

**A** National appeal for two millions of dollars in contributions to the aid work of the Lammie Medical Center finally will be launched throughout the nation on March 14, and through the succeeding three weeks. The Medical Center urgently needs a minimum of 20 million dollars to carry on its work in the subjugation of human suffering. When the theory made its appeal last May there was a general response and it is confidently felt that the people of America will come more fully

**STATE SOCIALISM**

Frieder Aberkane has warned the people of Albania that the country is in danger of moving unthinkingly to a world state socialism.

There is ringing truth in the warning. And without training any political leadership whatsoever from the situation, everyone might see that the fallacious shortcuts of that apostate doctrine are going to exercise a dangerous appeal for the masses if democracy does not begin to clean out the parasites at every step.

Revisionism does perform what it promises. Its moral objective are human and liberal. Its monetary proposals are tempting. But the price of the change makes the benefits to be realized far greater than their beneficiaries. If what we do to secure monetary

The tendency to relax is harmful. Stay on guard in doing the right thing. There is a danger that many citizens who have been having War Bonds Certificates may decrease their regular purchases unless they are continuously reminded of the importance of these purchases. Continued success of our war effort depends very largely on your continued purchase of War Certificates. Keep on having as many as you can afford and inspire your friends to do likewise.

### Nutrition and National Health

IN RECENT YEARS, the subject of nutrition, or rather its relation to health, has become a household word. The average Canadian citizen is becoming more and more health conscious. He is becoming more and more aware of the fact that the food he eats is the foundation of his health. He is becoming more and more aware of the fact that the food he eats is the foundation of his health. He is becoming more and more aware of the fact that the food he eats is the foundation of his health.

### How System is Needed

A recent survey among the various population groups has shown that the average family here was increasing less than 100 per cent of the food intake. This is a significant fact, for the reason that the average family here was increasing less than 100 per cent of the food intake. This is a significant fact, for the reason that the average family here was increasing less than 100 per cent of the food intake.

In addition to harrying the airlines, the United States has practically a complete monopoly on the production and passenger planes. Boeing and Douglas are the only manufacturers in this country and the United States has been concentrating on production of other types aircraft, such as bombers, fighters, transport, and cargo planes.

There are powerful forces in the United States largely confined to this aviation industry that would like to see American-made aircraft dominate flying throughout the world.

The volume time has come to test the only way brought to produce the United States although it may be to create the most modern industry. It is abundant reason to believe it does not require the aid of Germany in high places in Washington. On the contrary there is plenty of evidence that when the United States gets around to seeking bilateral arrangements, there will be considerable arms and labor.

There are several ways of increasing the production of post-war aviation control on a technically stable basis. One way is to increase the production of aircraft.

### MOVING TO YOUR SIDE

### AN INTERNATIONAL

If you were to ask the question, "What are we fighting for?" the questioner's answer, at least in part, would be to ask us why we are fighting and what we are fighting for, which is to be a better world than the one we have now. But when that job is done, the world will not be finished unless the "International Home" is ordered that it will never be necessary to do the job over again. There are many reasons to hope that in the final outcome (at which no one has the slightest doubt) it will never be necessary to do the job over again. There are many reasons to hope that in the final outcome (at which no one has the slightest doubt) it will never be necessary to do the job over again.

**Nigeria in West Africa is  
The Largest British Colony  
And Gibraltar The Smallest**

**W**HILE it is the largest British colony, Overseas Dutch is smaller than the West Indies. It tells about how Englishmen the question arose when a pile of 600,000 acres in the New Netherlands, Australia, Canada, West Indies, New Zealand and New Caledonia were included as there was no longer a Dutch colony. The territory was so small that hardly any Englishmen and still fewer Dutchmen could go. It took an entire century to get away and a whole century to get back. The territory was the largest of population and area.

[illegible]

The younger Bushman is very familiar with these parts of the Empire but strange to say the largest and most populous Colony engaged their quest.

The largest British Colony happens to be New South Wales. It covers 1,148,000 square miles, and is the only one of the Empire that has a large population.

has a population of less than 200,000 people. It is about as large as the quarter of all the African "Yours (Seymour) take together" (more 1,575,000) and the same. The population is between half of the total of all the others. The British Colonial

The Palmed Islands form a contrast to Gibraltar. They have an area of over 5,000 square miles, but only 1,000 people live there so that every single person has 2½ square miles at his disposal.

Assuming that the entire population of British colonial territories totals some 22 million people the model and peaceful administration of these countries must be regarded, writes Mr. Dulak as a tremendous achievement considering there are no more than 200,000 European liv-

ing in these territories and of these 300,000 Europeans more than half are concentrated in four parts of the Empire. Seventy thousand Europeans live in Northern and Southern Rhodesia, about 30,000 in Kenya, Tanganyika and Uganda come to 10,000 in Kote Kote, Swaziland and the Biko

When planning to grow seed, it is important to consider the following factors:

1. The quality of the seed.
2. The quantity of the seed.
3. The time of year to plant.
4. The location of the seed.
5. The method of planting.
6. The care of the seed.
7. The harvest of the seed.
8. The storage of the seed.
9. The distribution of the seed.
10. The sale of the seed.

The new branch is located in the town of Paramaribo, which is the capital of Suriname. The company has recently acquired a large tract of land in the area, and is now beginning to plant citrus trees. The new branch is expected to be a profitable addition to the company's existing operations in the region.

### Writer Appraises Some Of The Damage Caused By Bombs In Britain And The Civilian Morale

**ALL CANADIANS** are unanimously agreed that the bomb damage in Britain. We based our report in *Canada* that everywhere we went we were certain to be told about it. It has been said that there is not a Canadian who has not heard of the bombing of London. It is true that in the past few years we have heard that there is a bomb. After reading and hearing the truth for London, we were surprised to find that the city of London damage would have had been something for general news.

There are in sight of bomb damage, but seen in any of the smaller cities. It is not in the case of the cities. It is in London there are large times that appear to have been destroyed. It is not in the case of the small cities. The damage had not been the destruction of Britain.

Where a building has been totally destroyed, it is not in the case of the small cities. It is in London there has not been any building that

### Belgians Have Established A Fishing Post On British Coast And Give Scientific Training

Many think English literature is a small island in a sea of English. The very point of their subject is that English tells rather more about a series of craft and thought than about a series of words. The fact that there exists a subculture for the English with others outside it is not a sign of its exclusivity and even foreignness, but of its maturity and self-confidence and finally of its Britishness.

Professor Gifford, who has been at the University of Cambridge for 20 years, is one of the few who still live in the old city. In Cambridge, town part of the University is the University, and the old city is the city. He has been a member of the Faculty of English, where he has been a professor of English literature for 10 years. He has been a member of the Faculty of English literature for 10 years. He has been a member of the Faculty of English literature for 10 years.

## Transport Prices CANADA'S WHEAT

By 1941, the estimate of wheat production in Canada in 1942 places the figure at 200,000,000 bushels or half of the third estimate of the same bureau for the 1942-43 season. The 1941-42 wheat crop in the United Provinces alone 1937 was 100,000,000 bushels, a record which was surpassed during the years 1938-39, 1939-40 and 1940-41. The 1941-42 crop was predicted on the smallest estimate awarded to wheat in Canada since 1923.

the wheat crop a sharp upsurge from a year ago.

The Texas Panhandle Producers' estimate for 275 million bushels of the wheat crop, estimated by 1966, is both optimistic and conservative. The yield per acre compares favorably with the 1965 average of 34 and 35 bushels, respectively, while in Alberta the yield is just under the long-term average of 33 bushels per acre. The yield in the three provinces is 31.7 bushels per acre compared with 28.4 bushels in 1965.

As regards the third estimate for the 1966 wheat crop it is still subject to revision and the final estimate will be made until January 1967. Present substitution suggests that the 1965 crop was overestimated by about 35 million bushels.

with the war. Milk is important in safeguarding the health of our armed forces, our civilian workers and the people of Britain. The 7-point milk production program sponsored jointly by the Alberta Dept. of Agriculture and the Farm for Victory Committee is planned to *assure steady flow of milk to produce enough for Victory. The 7 points are:*

Provide abundant pasture; plenty of good hay; feed balanced rations, using protein concentrates wisely; large quantities of fresh water; condition cows for freshening; raise calves with less milk and more milk to market; prevent waste and deterioration.

On Jan. 20, 1992, the late Mrs. Mary Ann (nee) Smith, 78, of 1000 S. 10th St., died at her home. She was born Jan. 10, 1914, in St. Louis, Mo., and was the daughter of the late Mr. and Mrs. John Smith. She was married to the late Mr. Robert Smith, who died in 1968. She was a member of the St. Louis Chapter of the Order of the Eastern Star. She is survived by her son, Mr. Robert Smith, and his wife, Mrs. Mary Ann Smith, of St. Louis, Mo.; her daughter, Mrs. Mary Ann Smith, of St. Louis, Mo.; and her son, Mr. Robert Smith, of St. Louis, Mo. She is also survived by her grandchildren, Mr. Robert Smith, Mrs. Mary Ann Smith, and Mr. Robert Smith. She was preceded in death by her husband, Mr. Robert Smith, and her son, Mr. Robert Smith. She was buried in the St. Louis Cemetery.

William's United Methodist Church was held on Thursday at the home of Mrs. E. C. Hines with the Pres. Mrs. H. C. Hines presiding in the chair. The December period was conducted by Mrs. Hines and was conducted by Mrs. Hines and Mrs. Vagi.

A very gratifying financial report was presented by Mrs. C. Hines. The report was responded to by telling of Christmas customs in various parts of the world. Two contributions

were by Mrs. Young and Miss Hines to be given to the Red Cross. The Christmas time was made toward the annual Home Day to be held in the church here.

A report of thanks was made the retiring officers of the Mrs. Hines presiding. The election of officers for 1934

Department of Health  
 "Working on syphilis is a laborious and nonproductive task," the report says emphatically. "Of course, the only way to control the spread of venereal diseases is through the education of both employers and employees. But this education was not necessary. It was not necessary to tell employers to stop hiring anyone with syphilis to spread word of the employment contract." Many workers had been given the message by being informed of the disease. The conclusion was drawn: If this attitude continued

## Operations Of The Canadian Army In Various Theatres After Four Years Of War

Twelve long years of war gave the American Army a unique prestige to share for three years of unrelenting training, fighting and marching under heat and weather. The results in which the army shared glory and sacrifice with British and American forces were the conquest of Italy, the liberation of Italy and the conquest of a large part of the Italian mainland and the capture of Berlin last September had helped in the American taking the Pacific Islands of Iwo Jima and Okinawa.

When the British Army needed the opening of his command by war offensive operations for the Canadian Army. The division had been training from its establishment in December 1939 and the formation of war had become of the high command assigned. I will be large

## Many Measures Are Suggested

**Want to Increase Your Sales?**

There are three ways to do this:

1. **By Price**

Some buyers think that low prices are the only way to get more business. This is a mistake. Lower prices can lead to lower quality, and lower quality can lead to lower sales. It's better to sell at a higher price and provide better service than to sell at a lower price and provide poor service.

2. **By Service**

The most important way to increase sales is by providing excellent service. This means listening to your customers, understanding their needs, and providing solutions that meet those needs. It also means being responsive to their inquiries and complaints.

3. **By Promotion**

Promotional activities can help you reach new customers and increase sales. This can include advertising, public relations, and direct marketing. However, it's important to choose the right promotional activities for your business and to track the results of your efforts.

**TO SAVE MONEY**

There is no reason, when saving is the main order of the day, borrowing may also be in order. There may be opportunities to make a money play having cash obtained through a personal loan. There may be contingencies when ready money will prevent avoidable loss. If you need money for timely purposes, do not hesitate to talk over your needs in confidence with the manager of our branch in your own locality.

Every day we are making personal loans to wage

financial people, executives and other persons having a steady income.

In addition to the difficulty of obtaining studies of lumber for local customers, Beaver Lumber is further hampered by a serious man-power shortage.

Many Beaver men have gone into the greater field of service in the second forest. There are only six still on the job here but to many on under trying conditions.

Working long hours, willingly and cheerfully, the Beaver Lumber men have endeavored to give good service — and has been largely successful — thanks to the sympathetic and helpful co-operation of the local customers, without which it could not be done.

For the best selection of materials available, and for the best service, please call your own requirements with the Beaver agent at an early date.

At the official celebration, guests and visitors from London and France were present, along with the French ambassador, the president of the Académie Française and the president of the Académie des Beaux-Arts. The ceremony was presided over by the French ambassador, who presented the award to the artist. The artist's acceptance speech was in French, and he expressed his gratitude to the French people for their hospitality and to the Académie Française for its recognition of his work. The artist also mentioned his admiration for the French people's love of art and culture. The ceremony was a grand affair, and it was a great honor for the artist to receive the award. The artist's acceptance speech was a beautiful tribute to the French people and to the French language. Prayer the first thing to be repeated by the participants in the underground Polish church service. The service took place in a room in the Warsaw suburb of Ursynów. There, six people sat on straw mats. They said prayer to their friends in person, while others listened on that same radio set. It is reported that 100,000 listeners of thousands of Belgians, and other Europeans, are following the service, and that the underground church is spreading its efforts.

# CANADIAN BUSINESS HELPING WAR EFFORT

Businessmen across Canada are helping the war effort in many ways. Some are donating money, some are donating goods, and some are donating their services. The Canadian War Relocation Authority is a good example of this. It is a non-profit organization that helps Japanese Canadians who have been interned in Canada during the war. The authority provides them with food, clothing, and other necessities. It also provides them with education and training. The authority is run by a board of directors, and it is supported by the Canadian government. The authority has been very successful in helping Japanese Canadians during the war. It has helped them to survive and to rebuild their lives. It has also helped them to contribute to the war effort. The authority is a testament to the generosity and compassion of the Canadian people.

# DAMAGED CANADIAN MINNESOTA IMPROVES SAIL AND SO REACHES PORT

When the engine of the *Minnesota* broke down, the ship was in a bad way. The crew was stranded in the middle of the ocean, and they were running out of food and water. The ship was damaged, and it was in danger of sinking. But the crew did not give up. They worked hard to repair the engine, and they managed to get the ship back to port. The ship was then taken to a shipyard, where it was repaired and put back into service. The crew was praised for their bravery and their hard work. The ship was then sent back to sea, and it has since been used for many years. The *Minnesota* is a testament to the resilience and determination of the Canadian people.

Lord R. B. Walker, M.P., Minister of the Interior, is seen with the crew of the *Minnesota* after the ship's return to port.

The ship was then taken to a shipyard, where it was repaired and put back into service. The crew was praised for their bravery and their hard work. The ship was then sent back to sea, and it has since been used for many years. The *Minnesota* is a testament to the resilience and determination of the Canadian people.

# Call From Churchill Not Believed Gange

A message from Churchill, Ontario, was received by the Canadian War Relocation Authority. The message was from a man who claimed to be a Japanese Canadian who had been interned in Canada during the war. He claimed that he was in a very bad situation, and he needed help. The authority was contacted, and they tried to find out more about the man. But they were unable to find him. The message was then ignored. The authority has since received many other messages from people who claim to be Japanese Canadians who need help. But they have been unable to find any of them. This is a sad situation, and it shows the need for more help for Japanese Canadians during the war.

# Remarkable Production

**FLORIAN KRAUSE**

It is necessary because of shortages of materials and competent parts. Farmers are helping to ease the situation by making their own parts. They are also doing a lot of repair work through greater use of repair parts. Production of these repair parts has been increased to 150 per cent of normal output and they are not rationed since the Warrenton Process and Trade Board.

and this will provide the

date of the manufacture of synthetic rubber in Canada. The story of this great achievement by Canadian scientists and Canadian industrialists is surely one of the most remarkable stories arising from the recent war.—*Ontario Citizen.*

# PROBLEMS FACING USE OF HELICOPTERS

Helicopters are being used in a variety of ways in the Northwest. They are used for medical evacuation, for transport of supplies, for fire fighting, and for many other purposes. However, there are several problems facing the use of helicopters in this region.

One of the main problems is the lack of suitable landing areas. Many of the areas where helicopters are needed are in remote locations, and there may not be a suitable landing area nearby. This can make it difficult to land and take off, especially in bad weather.

Another problem is the cost of operating helicopters. Helicopters are expensive to buy and maintain, and the cost of fuel can be high. This can make it difficult to justify the use of helicopters in some situations.

Finally, there is the problem of pilot training. Helicopter pilots need to be trained in a variety of skills, including navigation, communication, and emergency procedures. This training can be expensive and time-consuming.

# Bill Instructors Go Overseas

Bill Instructors are going overseas to provide training for the Canadian Forces. These instructors are highly trained and experienced, and they will be working with the Canadian Forces in various parts of the world.

The instructors will be responsible for training new recruits, as well as providing advanced training for experienced soldiers. They will also be responsible for conducting exercises and simulations to test the soldiers' skills and abilities.

This is a great opportunity for the instructors to share their knowledge and experience with other soldiers, and to help them develop their skills and abilities. It is also a chance for the instructors to see the world from a different perspective and to experience the challenges of training in a foreign environment.

# Just One Letter

Just one letter can make a difference. It can be a letter of support, a letter of encouragement, or a letter of criticism. Whatever the content, a letter can have a powerful impact on the person who receives it.

Letters are a great way to communicate with someone who is not nearby. They allow you to express your thoughts and feelings in a thoughtful and deliberate way. They can also be a source of comfort and support for someone who is going through a difficult time.

So, if you have a letter to write, don't delay. Write it now, and you may just make a difference in someone's life.

# THE SECRET WEAPON THAT REALLY WORKS

The secret weapon that really works is the power of the human mind. The human mind is a powerful tool that can be used to achieve great things. It can be used to create new ideas, to solve problems, and to overcome challenges.

The key to using the power of the human mind is to have a clear goal in mind. Once you have a goal, you can use your mind to develop a plan to achieve it. You can use your mind to overcome obstacles and to stay motivated throughout the process.

So, if you want to achieve your goals, use the power of your mind. It is the secret weapon that really works.

You won't get to Berlin in an Armchair!

If Canada and the United Nations had depended upon "Armchair Soldiers" to fight this war, the Nazis and Japs would have grabbed this country long ago.

There is no "Royal Road" to Berlin. It's fighting all the way and Canada's Army made every man it can get. That's why, today, we should volunteer for overseas service. You'll need months of intensive training to make you fighting fit.

Don't be a way-ahome and a member of the other fellow's do it. Get into the uniform with the G.S. badge of honour on your chest. If we're going to win this war, we'll have to do more than just read about it in the papers.

So, come on you fellows, the good old army has got to finish the job!

**MANANA'S BIRTHDAY, JULY 19TH, 1964**

The week, yesterday, July 19th, we again celebrate Canada's birthday. It is interesting to read and study the history of Canada, and to see how far we have come since 1776. It is also interesting to see how far we have come since 1945. It is a testament to the strength and resilience of the Canadian people, and to the values that we hold dear.

The Canadian National railway station of the future. Designed by the architect, the station is a masterpiece of modern architecture. It features a large, arched roof structure that covers the entire platform area. The building is constructed of field stone and glass, giving it a unique and modern appearance. The station is located in a city, and the surrounding area is well-developed. The station is a landmark building that will serve the community for many years to come.

**SOCIAL DISEASES—Article No. 1**

You drag are used alternately in the treatment of early syphilis, namely, Arphenamine and Bismuth. Arphenamine is a powerful, yellowish in color, and after being dissolved in specially purified water, used as an injection into a vein. There is little or no pain accompanying the treatment. The drug will circulate through the various organs of the body destroying the syphilis germs with rapidity. Arphenamine is an arsenical preparation which will stop the infection and bring about your cure. Nothing is known to mankind at this time which will do it, and all the haughty methods of human cure will be of no help. It usually takes from 20 to 40 treatments, which alternate without rest with Bismuth. Because of the advanced treatment with mercury pills through the mouth, this treatment is given for four months.

The second of the two drugs used, Bismuth, has replaced the potassium arsenite, as there is no other likelihood of danger and complications. It is a powerful opportunity for the patient to be treated with the drug. Bismuth is a powerful, yellowish in color, and after being dissolved in specially purified water, used as an injection into a vein. There is little or no pain accompanying the treatment. The drug will circulate through the various organs of the body destroying the syphilis germs with rapidity. Arphenamine is an arsenical preparation which will stop the infection and bring about your cure. Nothing is known to mankind at this time which will do it, and all the haughty methods of human cure will be of no help. It usually takes from 20 to 40 treatments, which alternate without rest with Bismuth. Because of the advanced treatment with mercury pills through the mouth, this treatment is given for four months.

It is apparent that some arsenic or lead which will follow this treatment, but you should not become all worked over this, as some discomfort may go with it, if the drug is to do its work properly. About half way through the treatment a spinal fluid examination should be made in order to recognize, arrest and cure any nervous disease such as general paralysis or locomotor ataxia. If this fluid test is made early during the treatment, it is to establish truth that much of the blindness, crippling and insanity due to this horrible disease, can be stamped out. The worst that may happen from this treatment is a headache that may linger for some hours.

Perhaps before you become aware that you might have the disease, you may have exposed others to it. Your course in that case is to limit on a full investigation of everyone involved, and this constitutes at least a blood test. If you can, bring to the doctor the person who gave it to you. Work your remedy for all the facts and give them to your doctor. Remember that you and those associated with you will be protected. The aim is to stop the disease and not pass judgment or punish.

Are the possibilities of a cure barred to those who cannot afford to have the services of a private physician? We are pleased to inform you that such is not the case. You and those who are honestly unable to pay for such treatment, we state that you may receive medical attention from Government operated hospitals or Clinics, of which Alberta has its share, absolutely free of charge.

When the public becomes aroused enough to take advantage of the opportunities open to them, many persons will be found who have information that they were despoiled by the disease, and this constitutes a blood test. When it is said that those who through their own mistakes or those who innocently have contracted syphilis, absolutely may be healed, it is said to men in all honesty. But it must also be said that the cure and the healing of the terrible blot that venereal disease has on the human world demands enduring courage, honesty and patience from the sufferer and humanity and sympathy from the doctor. With the two working side by side and shoulder to shoulder, follow is the healing, and syphilis will be banished from the earth.

This article is the final in the series and we hope that every single reader of this paper has derived some good and lasting knowledge from them. It is funny, but we have been badly commended and ridiculed for writing on such a theme. Aside from all of this, we feel that those things most closely associated with human welfare are the things that should be talked about. To those who will pay attention, some all benefit, and those who will not listen, well, nothing can save them. If we have revealed one person from contracting the disease by instituting in that one a word for caution, or if we have saved one person who has already contracted the disease, to such end, we feel that we have done our duty. We have done something of which we are justly proud.

# TEA

### Visitor From Tokyo

Editor of *The Washington Star* and *Washington Evening Star* is expected to have a presentation of 5,000 copies of *Wholesaler's* Volume 1, to be made to the newspaper's Tokyo publisher of the same name. The presentation is expected to be attended by Chao Hsiao-shan, director of the Japanese tea trade mission.

*Wholesaler's* Volume 1, the second issue of *Wholesaler's* for 1958, was published in the 1958-59 season. The publication is a quarterly magazine of tea news and information.

### Shanghai Tea

Shanghai tea is being sold in the United States in a new package of 100 tea bags. The package is made of a special material which is designed to keep the tea fresh and to prevent it from becoming stale. The package is also designed to be easy to use and to keep the tea dry.

**THE YOUNG WIVES OF THE SOUTH**  
The young wives settled at the foot of the mountains in the experimental Rastafarian hamlet, B.C. were leg-banded in 1942 just before leaving the coast. A quick note kept them from being leg-banded. (The first female was seen with the leg-banded, showing that at least one of the women had been in the place of the boys to spend the summer.)

Behind the scenes, entertainment  
fans still see performances of both  
saxophone and piano in the larger  
theatres as they become available.  
Already there are a number of  
concerts and new films are shown  
simultaneously with their showing in  
London. Arrangements have also  
been made, in co-operation with  
the British Council, for the exhibi-  
tion of films in theatres connected to  
the visit programme.

Admission has been free to the  
concerts, and the films are shown  
free of charge. The British Council  
has arranged for the films to be  
shown in the theatres and the  
concerts to be held in the same  
venues.

**CO-OP MEET CO-EDUCATIONAL**  
The Socialist-Roosevelt Co-operative Wholesale Society has purchased the Cushing Mill at Youth Avenue and Dearborn Street, Eastwood. A program of the old mill or co-op will be converted into a food manufacturing plant and the business until the company's present plans for expansion fully materialize will be sold for storage. The Cushing plant has been closed for a period of ten years.

# Just a little longer -

'til these footsteps turn toward home!

WE HAVE come to the crucial stage of this war. There can be no turning back. It is essential we give our forces the backing that will help them march right in to the last enemy stronghold, to claim a complete, lasting victory.

It is up to each of us to do our utmost,

without delay, to help our men achieve the goal we have all dreamed of now so long — unconditional surrender.

It's time to act! Every bond we buy in this Seventh Victory Loan hastens the day when the boys come home! That is why it is vital each of us buy one more bond than we bought before.

**War on Cancer**

When Should It Begin?

By the time the first signs of the deadly disease are detected, the chances of survival are slim. That is why the American Cancer Society is launching a "War on Cancer" campaign. The goal is to prevent cancer before it starts. The first step is to know your own body. If you notice any changes in your skin, or if you have a lump in your breast, or if you have a cough that won't go away, see your doctor right away. Early detection is the key to survival.

There have been a number of other reports of the same kind in the past, but they have not been confirmed. Mrs. Schuchman married Fritz Wolschke Friday evening and will again be the new bride after a year, having lived with her son-in-law Mr. Oswald of Prince George, who married

shealy II from a recent strike at the Yukon and today resides at the H. Holm house, family address.

A funeral party was held at home of Mr. and Mrs. L. J. Smith, close friends of Ray, yesterday, but very quiet, as it was possible at Wolschke's.

**One person can start it**

When one person demands more for goods or services he compels others to do the same and Price Control goes out the window.

**To prevent a repetition of the conditions following it**

**PRICE CONTROL MUST BE MAINTAINED AS LONG AS INFLATION TENDS UP.**

We can only be sure if production is efficient and economical, costs are reduced and consumers refuse to pay more than selling prices.

THIS IS ONE OF A SERIES ORDERED BY THE GOVERNMENT OF CANADA TO ENLIGHTEN THE CONSUMER ON MATTERS OF IMPORTANCE SUCH AS THE COST OF LIVING. THIS PAMPHLET MAY BE OBTAINED FREE OF CHARGE FROM THE NATIONAL BUREAU OF INFORMATION, OTTAWA, CANADA.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were grown in YEA medium at 28°C for 24 h. The cell concentration was adjusted to 10<sup>8</sup> cells/ml. The cell suspension was mixed with 100 µl of the plant cell suspension. The mixture was incubated for 24 h at 28°C. The plant cells were then transformed with the *Agrobacterium* suspension. The transformation efficiency was determined by the number of transformants per 10<sup>6</sup> plant cells. The data are the mean ± SD of three independent experiments.

After several days descending the Mississippi for Buenos, the ship was supposed to return to the United States to help last winter for another load. The cargo caught in a storm. By the time the cargo finally arrived, the boat and store of the freighter were in ruins again. A U.S. destroyer and two naval tug boats took them to New Orleans. The cargo was taken to West Haven, N.C., and put together again.

## The Mining Industry

**SEVEN-ONE SIX** has been a good year for the mining industry in Canada. It is a fact that is well known to all who are interested in the industry. The industry has been able to produce a large amount of minerals and has been able to export a large amount of minerals to other countries. This has been a great success for the industry and has helped to build up the Canadian economy.

**Supply Exceeds Demand**

Canada's mineral supply is considerably in excess of her actual needs. This is due to the fact that the industry has been able to produce a large amount of minerals and has been able to export a large amount of minerals to other countries. This has been a great success for the industry and has helped to build up the Canadian economy.

**Future Growth Is Important**

In the future, the mining industry in Canada is expected to continue to grow. This is due to the fact that the industry has been able to produce a large amount of minerals and has been able to export a large amount of minerals to other countries. This has been a great success for the industry and has helped to build up the Canadian economy.

**Shoreland Outfitted With New Boats**

The shoreland has been outfitted with new boats. This is due to the fact that the industry has been able to produce a large amount of minerals and has been able to export a large amount of minerals to other countries. This has been a great success for the industry and has helped to build up the Canadian economy.
